

Carderock® Drywall Stone

Carderock® Drywall Stone is somewhat flat and irregular in shape, with many stones having one good face. This rustic grade of stone is suitable for semi-dry and solid masonry retaining walls, and can also be used as hand-placed rip-rap in swales and dry stream beds. The stone averages 8" to 14" in depth, 4" to 10" in thickness, and up to 24" in length. Approximate coverage is 12 to 15 square feet per ton. Pallets average approximately 1.5 tons.

Carderock® Stone is a registered trademark of Tri-State Stone® and Building Supply, Inc. , and is only produced at our quarry in Bethesda, Maryland. www.carderock.com Pictures and information may not be reproduced without permission.
