ABOUT

Carderock Stone is a mica-schist quartzite building stone quarried by Tri-State Stone & Building Supply, Inc. from the same location since 1926. Its unique seam structure allows it to be worked into many different installation styles. The vibrant blues, browns, grays and greens create an aesthetically pleasing color pallet. The unique color range, durability and ease of use have made Carderock Stone a favorite of architects, designers, masons and homeowners for generations.

PRODUCTS

Carderock Stone is available in 2 stacking wallstone grades, 3 full thickness veneers including a sawn ashlar, 3 thin veneers, a tumbled landscape grade, a landscape aggregate, steppers, and landscape boulders. Tri-State Stone & Building Supply, Inc. is also a full service stone dealer with over 100 other types of stone.

PERFORMANCE

Carderock Stone is a durable, as well as beautiful, building stone. There are no freeze/thaw concerns. Its many grades and workability allow its incorporation into any

design from rustic to formal. Any project will benefit from the incorporation of Carderock Stone.

SUSTAINABILITY

Natural stone is the best building material available. It never needs painting or replacement. It is the only building material that gets more beautiful with age. It can be reclaimed and reused. Nothing evokes a sense of classic style and permanence like natural stone – Carderock Stone.
